EXPERIENCE

Hulu, Seattle, WA   September 2020 – Present
Software Quality Assurance Intern (QA/SDET)
- Launching app builds on specific devices like the Roku to replicate bugs and bug fixes from the developer's PR code to ensure that the product is bug free and up to date
- Mocking erroneous behavior using the Charles Proxy software to test the Hulu app/web builds under different circumstances that could impact the apps functionality
- Monitoring app/service hits and errors on Glyph and Datadog to authenticate the apps mechanism and to ensure that they're properly being registered by our services

Red Dot Corp., Tukwila, WA   March 2019 – August 2019
Assembly Line
- Worked as a unit with the members of the assembly line to meet both time constraints and productivity expectations from Quality Assurance (QA)
- Maintain communication with the team and lead throughout the day to ensure the fluidity of the work environment
- Reassured that the unit was properly assembled (buddy check) before employees on the line to help avoid mistakes
- Tested radiators and electrical components for each specific unit in accordance with their specific psi and wattage to avoid leakage and ensure no fire hazards

EDUCATION

Year Up, Seattle, WA   March 2020 – March 2021
Year Up is an intensive, competitive technical training and career development program with 250 corporate partners, graduating 4,000 students annually across 19 cities. The program includes college courses, professional training, and a six-month internship.
- Completed coursework in Object-Oriented Programming, Project Management, Advanced Excel, Public Speaking, Professional Skills, and Business Communications. I acquired specialized training in Quality Assurance, including JavaScript, test plans, test cases, functional specification documents, gameplay development, process flowcharts, and pseudocode.
- Year Up Certificate in Software Development & Test
- 3.8 GPA

Highline College, Des Moines, WA   March 2015 – December 2017
